SUMMARY

Java Backend Developer with **4+ years of experience** designing and developing scalable **Spring-based web applications** and RESTful services for enterprise systems. Experienced in building secure, high-performance microservices using **Java, Spring Boot, and MongoDB/MySQL**. Proven success delivering production applications for HP, handling large-scale data migration (**2M+ records**) and asynchronous processing using messaging systems. Strong expertise in **Agile development, debugging complex issues, code reviews, and building maintainable software systems**. Proficient in leveraging **Generative AI-assisted development tools like GitHub Copilot, Claude** to accelerate coding, improve productivity, streamline debugging, and enhance overall software delivery efficiency in modern development workflows.

WORK EXPERIENCE

Senior Software Engineer

Mar 2025 – Present

Mphasis (Client: Hewlett Packard)

Pune, India

- Designed and developed scalable backend services using **Java 17, Spring Boot, MongoDB, and MySQL** for enterprise web applications supporting HP platforms, leveraging GenAI tools such as GitHub Copilot and Claude to accelerate development, improve code quality, and streamline implementation workflows
- Developed and optimized **RESTful APIs** enabling secure communication across distributed microservices and backend services. Built asynchronous processing for heavy operations and file processing using AWS SQS.
- Executed large-scale **data migration of 2M+ records** using batch processing and scheduled jobs, ensuring zero disruption to production systems.
- Collaborated with cross-functional Agile teams and stakeholders to translate business requirements into scalable technical solutions.
- Implemented **Test Driven Development (TDD)** using JUnit achieving **90%+ code coverage**, improving reliability and maintainability.
- Debugged and resolved production defects, performed peer code reviews, and ensured compliance with secure coding and performance standards by leveraging AI-driven developer tools for root cause analysis, refactoring, and performance optimization.

Associate II Software Engineer

Jun 2022 – Mar 2025

Capgemini (Client: Hewlett Packard)

Pune, India

- Developed backend microservices using **Java, Spring Boot, and MongoDB** to support enterprise-scale applications. Harnessing AI-powered development tools like GitHub Copilot and Claude to speed up software delivery, elevate code standards, and optimize implementation processes.
- Designed and implemented **REST APIs** enabling efficient data exchange between services and improving application performance.
- Built asynchronous processing workflows using **RabbitMQ and AWS SQS** for background job execution and file processing.
- Worked closely with client teams in Agile sprint cycles to gather requirements, implement features, and resolve JIRA tickets.
- Maintained high-quality code through version control (Git), peer reviews, and automated testing with **80%+ test coverage**.

EDUCATION

Yeshwantrao Chavan College of Engineering

Nagpur, India

Bachelor of Engineering – Civil Engineering (CGPA: 8.5)

2018 – 2022

PROJECTS

Employee Management System

Capgemini Internship

Java, Spring Boot, Angular, MySQL

Jan 2022 – Apr 2022

- Developed a full-stack web application to manage employee records, roles, and department data.
- Built RESTful APIs using **Spring Boot** and implemented authentication using **Spring Security**.
- Designed responsive UI components using **Angular and Bootstrap**.
- Integrated MySQL database using **Spring Data JPA**.

TECHNICAL SKILLS

Languages: Java, JavaScript, HTML, CSS, Python(beginner)

Frameworks: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Angular

Databases: MongoDB, MySQL

Messaging Systems: RabbitMQ, AWS SQS, Kafka

Cloud: AWS (S3, SQS, SNS, CloudWatch)

DevOps & Tools: Docker, Maven, Git, GitHub, Postman, Apache Tomcat, Cron, WSL, CI/CD

Gen AI Tools: Github Copilot, Claude

Testing: JUnit, Mockito

Methodologies: Agile, Microservices Architecture, RESTful API Design, SDLC

CERTIFICATIONS

AWS Certified Cloud Practitioner

Mar 2024 – Mar 2027
